Stainless steel RV replacement boilertank

The Heatek boilertank is a replacement tank for the traditional Truma boilertank.

Advantages Heatek Boilertank

The Heatek boilertank is the ideal solution for a cracked boilertank or as a preventive measurement. The tank holds up to 6 liters of water, which is 20% more than any traditional boilertank. The new stainless steel design prevents any damage caused by freezing temperatures.

In order to ensure clean and high quality drinking water, the Heatek boilertank meets all safety requirements of the European Union.

Technical specifications ✓
